

# Part 630 - Hydrology

## [Chapter 1 - Introduction](#)

(09/1997)

### 630.0100 Introduction

630.0101 Duties and responsibilities of NRCS hydrologists

630.0102 Other technical guides

## [Chapter 2 - Watershed Project Evaluation Procedures](#)

630.0200 Introduction

630.0201 Work outline plan and schedule relationship

630.0202 Hydrologic evaluation process

630.0203 Design hydrology

Figures

## [Chapter 3 - Preliminary Investigations](#)

(11/2010)

630.0300 Introduction

630.0301 Making the preliminary investigation

600.0302 Summary

630.0303 Report

Figures

Example

## [Chapter 4 - Storm Rainfall Depth and Distribution](#)

(08/2019)

630.0400 Introduction

630.0401 Sources of data

630.0402 Rainfall Over a Watershed

630.0403 Temporal Distribution of Rainfall

630.0404 Uses of Precipitation Depth and Distribution

630.0405 Comparing Precipitation-Frequency Data and Distribution

630.0406 Smoothing Precipitation Values from NOAA Atlas 14 Data

630.0407 Development of 24-Hour Rainfall Distribution From 5-Minute Through 24-Hour Rainfall Values

630.0408 Example of Determining a Design Rainfall Distribution for a Region Based on GIS Data

630.0409 References

Tables

## [Chapter 5 Streamflow Data](#)

(3/2020)

630.0500 General

630.0501 Streamflow data types and sources

630.0502 Streamflow data collection

630.0503 Uses of streamflow data

630.0504 Considerations for use of streamflow data

630.0505 References

Tables

Figures

## [Chapter 6 - Stream Reaches and Hydrologic Units](#)

(11/2015)

630.0600 Introduction

630.0601 Reaches

630.0602 Project Benefits Estimation on Alluvial Fans

630.0603 Hydrologic units

630.0604 References

Tables

Figures

## [Chapter 7 – Hydrologic Soil Groups](#)

630.0700 Introduction

630.0701 Hydrologic Soil Groups

630.0702 Disturbed Soils

630.0703 References

Tables

## Chapter 8 - Land Use and Treatment Classes

(06/2002)

630.0800 General

630.0801 Classification of land use and treatment

630.0802 Classes

630.0803 Determinations of classes

630.0804 References

Tables

## Chapter 9 – Hydrologic Soil-Cover Complexes

630.0900 General

630.0901 Determinations of complexes and curve numbers

630.0902 References

Tables

Figures

Examples

## Chapter 10 - Estimation of Direct Runoff from Storm Rainfall

630.1000 Introduction

630.1001 Rainfall-runoff relationship

630.1002 Applications

630.1003 Accuracy

630.1004 References

Appendix

Tables

Figures

Examples

## Chapter 11 – Snowmelt

630.1100 Introduction

630.1101 Snowmelt theory

630.1102 Data sources

630.1103 Modeling snowmelt

630.1104 Snowmelt runoff

630.1105 Runoff hydrographs from snowmelt

630.1106 References

Table

Figures

Examples

630.1300 Introduction

630.1301 Stage versus area inundated methods

630.1302 Flood peak or volume versus area inundated method

630.1303 Frequency versus area inundated method

630.1304 Computer determination of area inundated

630.1305 Combination method of determining area inundated

630.1306 Stereoscopic and other methods

630.1307 References

Tables

Figures

## Chapter 14 - Stage Discharge Relations

- 630.1400 Introduction
- 630.1401 Development of stage discharge curves
- 630.1402 Collection of field data
- 630.1403 Discharge versus drainage area
- 630.1404 Computing profiles
- 630.1405 Road crossings
- 630.1406 References
  - Tables
  - Figures
  - Exhibits

## Chapter 15 - Time of Concentration

- 630.1500 Introduction
  - 630.1501 Definitions and basic relations
  - 630.1502 Methods for estimating time of concentration
  - 630.1503 Other considerations
  - 630.1504 Examples
  - 630.1505 References
- Appendices

## Chapter 16 - Hydrographs

- 630.1600 Introduction
  - 630.1601 Development of hydrograph relations
  - 630.1602 Unit hydrograph
  - 630.1603 Application of unit hydrograph
  - 630.1604 Unit hydrograph development for a gaged watershed
  - 630.1605 References
    - Appendix 16A Elements of a Unit Hydrograph
    - Appendix 16B Dimensionless Unit Hydrographs with Peak Rate Factors from 100 to 600
- Tables
- Figures
- Examples

## Chapter 17 - Flood Routing

Introduction

Elevation-storage and Elevation-discharge relationships

Reservoir Routing Methods

Channel Routing Methods

Unit-hydrograph Routing Methods

Figures

Tables

## Chapter 18 - Selected Statistical Methods

630.1800 Introduction

630.1801 Basic data requirements

630.1802 Frequency analysis

630.1803 Flow duration

630.1804 Correlation and regression

630.1805 Analysis based on regionalization

630.1806 Risk

630.1807 Metric conversion factors

630.1808 References

Tables

Figures

Examples

Exhibits

## Chapter 19 - Transmission Losses

630.1900 Introduction

630.1901 Assumption and limitations

630.1902 Symbols and notation

630.1903 Applications

630.1904 Examples

630.1905 Summary

630.1906 References

Appendices

Tables

Figures

## [Chapter 20, Watershed Yield](#)

630.2000 Introduction

630.2001 Water balance

630.2002 Methods of computer water yield

630.2003 Reservoir storage planning

630.2004 Data Sources

630.2005 References

Tables

Figures

## [Chapter 21 - Design Hydrographs](#)

630.2100 Introduction

630.2101 Determining runoff volumes for design of earth dams and associated spillways

630.2102 Principal spillway hydrographs

630.2103 Auxiliary spillway and freeboard hydrographs

630.2104 References

Appendices

## [Chapter 22 - Glossary](#)

(2/2012)

630.2200 Introduction

630.2201 Definitions

630.2202 Abbreviations and symbols

630.2203 Conversion factors

[H\_210\_NEH\_630 - Amend. 90, Mar. 2020 - ]
